OUR PRODUCTS

VICI healthier products

In order to address the needs of our customers and consumers, we produce a lot of products with some benefits. We offer wide range of BIO and vegan products by brand VICI. We are constantly striving to meet the expectations of our customers by developing and enhancing our products offerings. Our focus is on promoting the health and well-being of our customers and consumers. Therefore, we are committed to producing products that are free from additives such as E621 and polyphosphate, which are not beneficial for overall health. Instead, we emphasize the presence of essential nutrients like omega-3, vitamin D, and protein in our products to support a healthy diet. Additionally, we offer lactose-free, less fat, salt free and low sugar options to cater to specific dietary needs and preferences, ensuring that all individuals can enjoy our products while maintaining a healthy lifestyle.

One of our factories (Sistemas Britors, factory in Spain) has gluten-free certificate and produces only gluten-free products. This is important as gluten can trigger allergic reactions in many individuals. By offering gluten-free options, we ensure that our products are safe and suitable for a wider range of consumers with dietary restrictions or preferences.
